

Warsaw, 11 January 2024

Dear Customer,

We hereby declare that Atman has signed a contract for the purchase of Guarantees of Origin for 2024 that will cover the entire volume of power used in Atman Data Centers as planned for 2024. As a result, 100% of the electricity consumed by your infrastructure in 2024 will come from renewable energy sources.

In accordance with the contract and market rules, we will receive the Guarantee of Origin certificates, confirming the production of the energy from renewable sources, no later than the second quarter of 2025. Due to the complexity of the power generation process as well as the approval and acquisition of the Guarantees of Origin, it is not possible to obtain the certificates on a monthly basis.

Sincerely yours
